IMPORTANT DEFINITIONS

“Stable and Controlled” Means any *Medical Condition* (other than a *Minor Ailment*) for which all the following statements are true:

- There has not been a new diagnosis, any new *Treatment* prescribed or recommended, or *Change(s)* to existing *Treatment* (including a stoppage in *Treatment*), and;
- There has not been any *Change* to any existing prescribed *Medication* (including an increase, decrease, or stoppage to prescribed dosage), or any recommendation or starting of a new prescription *Medication* (exceptions: the routine adjustment of Coumadin, Warfarin or insulin and the change from a brand name *Medication* to a generic brand *Medication* of the same dosage); and
- There has not been any new, more frequent or more severe *Symptoms*, and
- There has not been any *Hospitalization* or referral to a specialist, and
- There has not been any medical exam, investigative testing or test results showing deterioration; and
- There has not been any *Treatment* recommended, planned or not yet completed, nor any outstanding test results.

All of the above conditions must be met for a *Medical Condition* to be considered *Stable and Controlled*.

“Change” Means a procedure prescribed, performed or recommended by a *Physician* for a *Medical Condition*, including but not limited to prescribed *Medication* (including *Medication* prescribed "as needed"), investigative testing and surgery.

“Treatment” Means any of the following alteration or deterioration of *Your* health status:

- Onset of new and/or more frequent *Symptoms*; or
- You* have received a new diagnosis; or
- You* have sought consultation from a *Physician*; *You* have been hospitalized; *You* have undergone examinations or tests for the purpose of establishing a diagnosis (other than routine); or
- Your Treatment* has been modified; *You* have been prescribed a new *Medication* and/or a *Medication* has been stopped and/or the dosage and/or the frequency of an existing *Medication* has increased or decreased (Exceptions the routine adjustment of Coumadin, Warfarin or insulin and the change from a brand name *Medication* to a generic brand *Medication* of the same dosage).
